declares for the listed products that:	Type 27d Discontinuous inline sampling valve (BR 27d) • with free shaft end
1. In the delivered state, the valve prepared for mounting on a 180° rotary actuator (not a clearly defined actuator system) is considered to be partly completed machinery as defined in the Machinery Directive 2006/42/EC. Machinery is considered to be partly completed machinery when the machinery manufacturer has not determined all required specifications such as model type, thrusts, torques etc. The start-up of these units is only permitted after the valve has been installed from both sides in the pipeline and a risk of injury can be ruled out as a result.
